

Subsection 2.—Private Schools.

Private Elementary and Secondary Schools.—There are numerous schools in each province except Quebec doing work similar to that of the ordinary provincially controlled schools, but that are not publicly financed or administered and hence are not included in Subsection 1. Except in Quebec, the private schools have from about 2 to 4 p.c. of the elementary and secondary pupils in the different provinces. In Quebec the proportion is about 10 p.c., but most of these schools are subsidized by the Provincial Government and reports include a record of them similar to, and in some cases (as of average daily attendance) inseparable from, the records of publicly controlled schools. Thus their statistics are of necessity included in Subsection 1. Table 7, however, shows their enrolment at intervals from 1921, the year in which the Education Branch of the Dominion Bureau of Statistics commenced the collection of reports from private schools. A directory of the schools is included in the "Annual Survey of Education, 1936"

Business Colleges.—There are private schools in fields of education other than elementary and secondary, the most numerous group working in the field of business and commercial education. A record of enrolment from this group also has been collected by the Education Branch of the Dominion Bureau of Statistics since 1921.

Subsection 3.—Higher Education.

Editions of the Year Book previous to 1938 include considerable current information on universities and colleges, concerning enrolment, graduates, teaching staffs, and finances. For example, at pp. 971-978 of the 1937 Year Book the enrolment and number of graduates of individual schools of higher education for the
