

graduates—about 4 p.c. of the young men and 1.5 p.c. of the young women. The proportion receiving degrees in Arts or Science is now nearly double that of fifteen years ago, but in several of the other faculties the proportion has not increased at all, and in some has definitely fallen.

It is of interest to recall that university education for women in Canada began only within the lifetime of the older generation still living. According to the archives of the Canadian Federation of University Women, it was not until about 1850 that women were first admitted to a university course in Canada, and only about 50 years ago that the practice became general.

There has been no tendency in post-War years for women to increase their enrolment in such professional lines of study as medicine, dentistry, pharmacy, law, theology, or missionary courses. A few appear in the record of every branch of study into which enrolment can be divided, except forestry, but they have held in the main to Arts, including Science and Commerce, and to Education, Social Service, and Public Health. Altogether they constitute about one-fourth of university graduates, but their proportion of the total has not tended to increase noticeably since the abnormal enrolment of returned soldiers came to an end in the early 1920's. Their proportion is highest in Ontario and the western provinces.

10.—Graduates from Canadian Universities and Colleges, 1930-38.

NOTE.—For figures from 1920-29, see pp. 993-997 of the 1938 Year Book.
