Value of Farm Capital.—The items included in the term "farm capital" as used in Table 4 are: lands and buildings; implements and machinery, including motor trucks and automobiles; and live stock, including poultry and animals on fur farms. The 1931 values of lands, buildings, implements and machinery were reported by decennial census taken at June 1, in that year. Changes in the total value of lands and buildings for the years 1932 to 1939 have been based on the value of occupied farm lands reported annually by crop correspondents, while those in the annual values of farm implements and machinery have been estimated on the basis of sales
