SECTION 1. HISTORY AND ADMINISTRATION.....	607		
Subsection 1. Development of Aviation in Canada.....	607		
Pre-War Civil Aviation and the Defence Problem.....	608		

Canada, nearly 4,000 miles in length from east to west, with the main topographic barriers running in a north-south direction, and a relatively small population of 11,422,000 (estimated population as at June 1, 1940), thinly distributed along the southern strip of this vast area presents unusual difficulties from the standpoint of transportation. Different parts of the country are shut off from each other by areas of rough, rocky, forest terrain, such as the region lying between New Brunswick and Quebec, the areas north of Lakes Huron and Superior, dividing the industrial region of Ontario and Quebec from the agricultural areas of the prairies, and the barriers interposed by the mountains of British Columbia. To such a country with a population so distributed and producing mainly for export, as do
