The average earnings on which compensation is based must be computed in the manner best calculated to give the rate per week or per month at which the worker was remunerated but are not to exceed \$1,500 a year in Nova Scotia and New Brunswick and \$2,000 in the other provinces. If for any reason the earnings of the workman at the time of the accident are not considered a proper basis for compensation, the Board may use as a basis the average earnings of another person employed by the same employer in the same grade of work, or by another employer in the locality. The rate of compensation of workmen under 21 years of age may be later increased if it is probable that their earning power, had the injury not been suffered, would have increased.

The statistics of workmen's compensation, as compiled by the various provincial boards are not tabulated on a comparable basis and must therefore be presented as a series of tables.

15.-Operations of the Nova Scotia Workmen's Compensation Board, 1932-41

Note.—Estimates for outstanding claims not included. Statistics for the years 1917-31 are given at p. 757 of the 1938 Year Book.
