

**Tuberculosis Institutions.**—The statistics regarding institutions for the treatment of tuberculosis shown in Table 6, include special units for the treatment of tuberculosis in general hospitals as well as the specialized sanatoria shown separately in Table 1. The deaths in these institutions from tuberculosis as shown here for 1940 were only 35.2 p.c. of the total deaths from the disease in Canada as shown under Vital Statistics at pp. 133-134 of this edition. However, the death rate from this disease has shown an encouraging decline since 1926. More complete details regarding these institutions and the treatment of patients are given in the "Annual Report of Tuberculosis Institutions", published by the Dominion Bureau of Statistics.
