Crude Death Rates of Different Countries.—The Netherlands, the Union of South Africa (Whites), Uruguay, Canada, Denmark and Sweden are the only countries with death rates under 10.0 per 1,000 population. The low death rates in the Prairie Provinces, to a great extent, are responsible for the low death rate for Canada. This is due, for the most part, in all three cases, to a favourable age distribution of population.

20.—Crude Death Rates of Various Countries and of the Provinces of Canada in Recent Years

(Sources: League of Nations Statistical Year Book 1941-42 and Population Index, July, 1943)

Country or Province	Year	Crude Death Rate	Country	Year	Crude Death Rate
