

**Value of Farm Capital.**—The items included in the term “farm capital” as used in Table 4 are: lands and buildings; implements and machinery, including motor-trucks and automobiles; and live stock, including poultry and animals on fur farms. Values of lands, buildings, implements and machinery were reported at the decennial censuses of 1931 and 1941. Changes in the total value of lands and buildings for the years 1932 to 1942 have been based on the value of occupied farm lands reported annually by crop correspondents, while those in the annual values of farm implements and machinery have been estimated on the basis of sales reported each year.

**4.—Current Value of Farm Capital in Canada, by Provinces, 1911 and 1942**

NOTE.—Figures in this table are subject to revision on basis of the 1941 Census.

<sup>1</sup> Based on preliminary 1941 Census data.

**Average Values of Farm Lands.**—The average values per acre of farm lands are as estimated by crop correspondents and show the rise in land values between 1910 and 1920, the general decline with moderate fluctuations from 1920 to 1929 and the rapid fall since 1929 to a point below the 1910 level for the country as a whole.
