<sup>1</sup> Includes production of the Northwest Territories.

<sup>2</sup> Subject to revision.

Table 6 shows the different minerals that made up the mineral production of each province and also the particular province or provinces that contributed to the production of each mineral in Canada in 1942. Because of the restrictions on space in this edition of the Year Book, these details for 1941 have not been included, but the information may be secured from the Annual Report on the Mineral Production of Canada 1941, published by the Dominion Bureau of Statistics.

## 6.—Detailed Mineral Production of Canada, by Provinces, 1942

NOTE.—Quantities and values of minerals produced during 1942 in Yukon were: gold, 83,246 fine oz., \$3,204,971; silver, 482,133 fine oz., \$203,296; antimony, 78 lb., \$13; tungsten concentrates, 968 lb., \$840; lead, 1,322,065 lb., \$44,448; total, \$3,453,568; and in the Northwest Territories: gold, 99,394 fine oz., \$3,826,669; silver, 22,531 fine oz., \$9,500; natural gas, 1,500 M cu. ft., \$335; petroleum, 75,789 bbl., \$108,477; tungsten concentrates, 98,218 lb., \$23,725; copper, 74,963 lb., \$7,561; total, \$3,976,267. War-time restrictions preclude the publication of data for other important minerals found in these areas! For the Dominion totals of individual minerals, see Table 2. Dashes in this table indicate no production recorded. The ton referred to is the short ton of 2,000 lb.
