In Table 10 are given the statistics of the grading of animals marketed through stockyards and direct shipments to packing plants for the years 1938 to 1942. In recent years the practice developed of grading an increasing proportion of hogs by the carcass after they have been dressed at the packing plant until finally, at the end of September, 1940, live grading was discontinued. Consequently the figures in this table for hogs graded alive during that year are for nine months only.
