<sup>1</sup> These institutions are classified in detail in Table 1. <sup>2</sup> Includes 10 general hospitals in Yukon and N.W.T. reporting: 5 salaried doctors, 24 graduate nurses, 71 total personnel; 5 X-ray and 2 clinical laboratories; 2,109 admissions, 95 live births, a total of 2,304 under treatment, 2,117 discharges, 64 deaths and 41,626 collective days' stay. Includes one private hospital in N.W.T. with: one salaried doctor, 3 graduate nurses, 7 total personnel; one X-ray and clinical laboratory; 250 admissions, 35 births, a total of 293 under treatment, 286 discharges, 1 death and 2,824 collective days' stay.

**Organized Services in Public General Hospitals.**—Organized services, which are analysed in Table 4, may be defined as specialized hospital departments or services in charge of specialists with up-to-date equipment and a technical staff specially devoted to problems in the indicated fields. Facilities available in a hospital merely for the use of general practitioners are not considered as organized services. Only organized services in public general hospitals are considered here and not such organized services in public hospitals other than general (as shown in the first part of Table 1) nor those in private, Dominion, tuberculosis and mental hospitals. It is, however, in the larger public general hospitals that the majority of such organized special services are to be found. Many of the smaller public general hospitals have facilities for study and treatment in the fields indicated here, but since they are not organized services as defined above, such facilities are not included in the figures. Table 1 indicates that, in 1942, there were 618 public general hospitals; 245 of these had organized medical staffs with 8,818 staff doctors.
