26.—Values of Production, Cost of Milk at Plants, and Income from Dairying, 1920-44, and by Provinces, 1943 and 1944

NOTE.—The first two columns of this table represent values based on total production, the entire milk supply being accounted for in each case. The third column is the cost of milk delivered for fluid and for manufactured purposes; while the fourth column represents the income received from the sale of milk, butterfat and dairy butter.
