¹ Includes freight and smelter charges and cost of ores treated.

A summary of the industrial statistics of the principal mineral industries operating in Canada in 1942 and 1943 is presented in Table 8. In spite of the difficulties imposed by the War through labour shortages, lack of new equipment and essential supplies necessary for the mines, the gross value of output for the entire auriferous quartz mining industry, including the value of recoverable metals, gold, silver, etc., totalled \$116,833,847 in 1943 compared with \$160,564,783 in 1942.
