<sup>1</sup> Net value is derived from gross value by deducting cost of materials, fuel and electricity.

## Section 2.—The Manufactures of Quebec, 1942

Among the assets of Quebec that have tended to develop manufacturing industries in the Province may be mentioned its natural resources of forests, water powers, minerals, and agricultural lands, and also its geographic position astride the St. Lawrence estuary permitting sea-going shipping to reach its main centres of population. Added to these natural advantages, there is a stable and industrious population, which is an important factor in industries such as textiles, clothing, boots and shoes, etc., where a large labour force is required.

The most notable change among the manufactures of Quebec in recent years has been the development of the non-ferrous metal smelting industry. This industry first appeared among the forty leading industries of the Province in nineteenth place in 1927. It has been in second place since 1935, and was in first place in 1942.

<sup>&</sup>lt;sup>2</sup> Individual statistics cannot be given because there are fewer than three establishments in each industry. Such industries are: in Prince Edward Island; cotton and jute bags, iron castings, slaughtering and meat packing, fertilizers, and sheet metal products; in Nova Scotia; sugar refineries, cotton yarn and cloth, wire and wire goods, coke and gas, and petroleum products; in New Brunswick; sugar refineries, railway rolling-stock, cotton yarn and cloth, and silk and artificial silk goods.
