PART III.—SUMMARY OF EXTERNAL TRANSACTIONS Section 1.—Canadian Balance of International Payments*

Canada's external economic relations are revealed in outline by statements of the Canadian balance of international payments. The statements present, in statistical form, a summary of the commercial and financial transactions occurring between Canada and other countries. They furnish, therefore, an over-all view of the external relations of the Canadian economy just as national income studies provide an outline of its internal structure. In an economy such as Canada's where external sources of income and demand furnish an important dynamic element to activity within the country, the balance of payments focuses attention upon the impact of external demand upon the Canadian economy, the expenditure of income outside of Canada, and the resulting financial and exchange aspects.

When the statements of Canadian international balance of payments for the pre-war years are contrasted with wartime years, the comparison shows that wartime developments have, in many respects, been an accentuation of a single pattern. But underlying the similarity in structure there have been outstanding differences in the mechanism of making international settlements which have been at the core of the financial problems arising out of developments in international payments during the War.

Before the War, particularly in the trade between the British Commonwealth of Nations and the United States, free exchange markets were the characteristic channel of international settlements between the principal trading nations of the

^{*} Summarized from the Report "Canadian Balance of International Payments, 1937-43" prepared by C. D. Blyth, B.A., Chief, International Payments Branch, Dominion Bureau of Statistics.
