¹ These institutions are classified in detail in Table 1.

² Includes 9 general hospitals in N.W.T. reporting: 4 salaried doctors, 16 graduate nurses, 71 total personnel, 4 X-ray and 1 clinical laboratory; 1,819 admissions, 81 live births, a total of 1,972 under care, 1,808 discharges, 63 deaths and 26,807 patient days.

³ Includes 1 private hospital in N.W.T. with 1 salaried doctor, 3 graduate nurses, 7 total personnel; 142 admissions, 29 live births, a total of 177 under care, 172 discharges, 3 deaths and 1,804 patient days.

Organized Services in Public General Hospitals.—Organized services, which are analysed in Table 4, may be defined as specialized hospital departments or services in charge of specialists with up-to-date equipment and a technical staff specially devoted to problems in the indicated fields. Facilities available in a hospital merely for the use of general practitioners are not considered as organized services. Only organized services in public general hospitals are considered here and not such organized services in public hospitals other than general (as shown in the first part of Table 1) nor those in private, Dominion, tuberculosis and mental hospitals. It is, however, in the larger public general hospitals that the majority of such organized special services are to be found. Many of the smaller public general hospitals have facilities for study and treatment in the fields indicated here, but since they are not organized services as defined above, such facilities are not included in the figures. In 1943, of the 592 public hospitals for acute diseases, 267 had organized medical staffs with 9,182 staff doctors.
