¹ Buildings used for habitation only.

² Does not include dwellings with tenure not stated.

Tenure and Kind of Dwelling.—As indicated in Table 27 the 1,457,526 owner-occupied dwellings constituted 55 p.c. of all occupied dwellings in Canada at the 1941 Census. In rural areas, dwellings occupied by owners represented about 75 p.c. of total occupied dwellings while in urban areas, owner-occupied dwellings were only about 40 p.c. of all occupied dwellings.

Of the total 1,115,629 tenant-occupied dwellings in Canada, 832,703 were found in urban centres. A considerable proportion of the latter would be apartment dwellings since almost all the 500,328 apartment dwellings shown in Table 27 were occupied by tenants. It is worth noting that, while the number of single dwellings in urban Canada increased from 707,150 to 735,795 between 1931 and 1941, or by 4 p.c., apartment dwellings increased from 333,374 to 500,328 over the same period, or by about 50 p.c. Some part of the increase in apartment dwellings would be accounted for by the conversion of single dwellings into apartments.
