

Pulp Exportation.—A table at p. 201 of the 1941 Year Book gives the exports of wood-pulp from the principal producing countries for 1913, 1938 and 1939. The latter figures are incomplete, owing to exigencies of war, and consequently the table has not been continued. Total exports of wood-pulp from Canada in the years 1942-45 will be found in Table 15 of the Chapter on External Trade.

Paper Production.—During 1944, 77 establishments produced 4,044,376 tons of paper and paper board with a total value of \$255,545,841, as compared with 3,966,344 tons, valued at \$234,036,152 produced in 78 establishments in 1943. In addition to newsprint, Canadian mills have a highly developed production of fine paper, wrapping paper, tissues, paper board and other cellulose products: in fine paper Canada produces close to 600 types. In 1944 newsprint paper formed 75.2 p.c. of the annual paper production in Canada; the production decreased by 0.2 p.c. but the value increased by 8.3 p.c. as compared with 1943. The remainder of the paper production was divided as follows: 14.5 p.c. paper boards, 3.9 p.c. wrapping paper, 3.8 p.c. book and writing paper, and about 2.6 p.c. tissue and miscellaneous papers.

11.—Paper Production in Canada, 1931-44

NOTE.—Figures for earlier years will be found in the corresponding table of previous Year Books.
