## 1.-Land Area of Canada, Classified as Agricultural, Forested or Unproductiveconcluded

<sup>1</sup>These totals embrace present agricultural land of all possible classes and land that has agricultural possibilities in any sense. <sup>2</sup> Very small or negligible. <sup>3</sup> Total agricultural land plus forested land minus forested agricultural land. <sup>4</sup> Includes open muskeg, rock, road allowances, urban land, etc. <sup>5</sup> The figures given are strictly estimates but are the best available until definite data are <sup>3</sup> Total agricultural land plus forested obtainable. <sup>6</sup> Includes 4 sq. miles of occupied land in Yukon and the Northwest Territories. <sup>7</sup> An estimate from provincial sources places the total area of land suitable for tillage at 6,626 sq. miles.

## Section 2.—National and Provincial Parks

National Parks of Canada.\*-The National Parks of Canada† had their beginning in 1885 when an area of 10 square miles around the hot mineral springs at Banff, Alta., was reserved for public use. In little more than 60 years the system has grown to include 26 parks with an area of over 29,660 square miles, and stretches from the Selkirk Mountains in British Columbia to the east coast of Cape Breton Island, Nova Scotia. These parks are developed and maintained by the National Parks Bureau at Ottawa, for the use and enjoyment of the people of Canada, and have become a tourist attraction of first-rate importance. They serve

<sup>\*</sup> Prepared under the direction of R. A. Gibson, I.S.O., Director, Lands, Parks and Forests Branch, peparted under the diffection of the diffection in the diffection

which are under Federal jurisdiction but, technically, are not National Parks.
