Out-Patient Departments.—Out-patient departments are operated in connection with hospitals or other institutions, and treat patients who do not occupy beds in the hospital. The extension of out-patient services to patients of modest means has far-reaching and beneficial effects. It may replace admission to hospital, or may serve to secure necessary and beneficial hospitalization. As a general rule out-patient departments are subsidized from the funds of the general hospital and separate records are not kept. Until a uniform system of accounting is adopted, it will not be possible to give the average cost per patient.

5.—Out-Patient Departments of Public Hospitals, by Provinces, 1945

NOTE.—Figures of tuberculosis sanatoria and government and municipal clinics held in hospitals are not included.

Province	Out-patient Departments	Patients	Treatments
New Brunswick.....	2	21,099	31,022
Quebec.....	29	426,438	913,297
Ontario.....	19	316,727	448,132
