

sanatoria shown separately in Table 1. The deaths in these institutions from tuberculosis in 1945 were 39.1 p.c. of the total deaths from the disease in Canada as shown under Vital Statistics at p. 166 of this edition. However, the death rate from this disease has shown an encouraging decline since 1926.

### 6.—Summary Statistics of Tuberculosis Hospitals, by Provinces, 1945

<sup>1</sup> Four units of public hospitals at Vancouver and Victoria are operated by the Provincial Board of Health and are included in Sanatoria. <sup>2</sup> Sanatoria only (exclusive of units in other hospitals).

<sup>3</sup> Includes other personnel.

### Subsection 2.—Statistics of Dominion Government Hospitals

**Dominion Government Hospitals.**—Hospitals operated by the Dominion Government are conducted for special purposes connected with departmental administration such as the care of war veterans and members of the Permanent Force, the quarantine and care of immigrants and lepers, the care of Indians as wards of the Government, etc.

Table 1 shows the number of Dominion hospitals compared with those in other categories for 1945. Table 7 gives the hospital accommodation as at Dec. 31, 1946, in hospitals administered by the Department of Veterans Affairs, including pavilions erected at the expense of that Department as additions to civilian hospitals and in which a definite number of beds are reserved for the treatment of Departmental patients. Tables 8 and 9 record the treatment activity in these institutions for the calendar year 1946.
