

1920, when farmers realized \$121,000,000 from their dairy products. In 1930 it moved up to \$150,000,000 but, owing to exceptionally low prices in the depression period which followed, it was reduced in 1932 to a figure comparable with that of 1928. From 1933 there has been an almost continual increase in income, reaching a total of \$286,000,000 in 1946.

Value of Dairy Production.—The farm value of milk showed an increase of \$23,000,000 in 1946 over 1945 and the total value of dairy products an increase of \$22,000,000 in the same comparison. Farm value figures shown in Tables 26 and 28, which include sales income and income in kind, reflect the extensions that have taken place in dairy farm undertakings. In 1946, 25 p.c. of the farm value of milk production originated in the Prairie Provinces while the two central provinces contributed 65 p.c.

20.—Production and Utilization of Milk in Canada, 1942-46, and by Provinces, 1945 and 1946

NOTE.—Figures for the years 1920-41 are given at p. 4 of the report "Dairying Statistics of Canada, 1946"; for the years 1939-41 at p. 237 of the 1946 Year Book.

Province and Year	Used in Manufacture		Milk Otherwise Used			Total Milk Production
	On Farms	In Factories	Fluid Sales	Farm-Home Consumed	Fed on Farms
