Subsection 3.—Electric Railway Traffic

The passenger mileage travelled by electric cars in 1945 amounted to 127,954,458, by trackless trolley-buses 2,168,204 and by motor-buses 45,375,858. The number of passengers carried by electric railways in the years since 1939 showed an especially sharp rise over previous years due to increased traffic resulting from improved conditions, and the curtailment of passenger automobile traffic as a result of the War. The 1,316,571,540 passengers carried in 1945 was by far the greatest traffic ever handled by these systems, the increase over 1944 being 5.4 p.c.
