<sup>1</sup>None recorded.

The two detailed tables showing principal imports into Canada for consumption from the United States, the United Kingdom and all countries and principal exports of Canadian produce from Canada to the United States, the United Kingdom and all countries, respectively, that constitute a regular feature of the Year Book treatment of Foreign Trade are omitted this year because later figures than those published in the 1946 edition (1945) were not available at the time of going to press. Comparable figures for 1946 are available from the Trade Reports published by the External Trade Division of the Dominion Bureau of Statistics.
