

**Tuberculosis Institutions.**—The statistics regarding institutions for the treatment of tuberculosis shown in Table 6, include special units for the treatment of tuberculosis in general hospitals and Dominion hospitals as well as the specialized sanatoria shown separately in Table 1. Deaths in these institutions from tuberculosis in 1946 were 41.2 p.c. of the total deaths from the disease in Canada as shown under Vital Statistics at p. 209 of this edition. However, the death rate from this disease has shown an encouraging decline since 1926.

### 6.—Summary Statistics of Tuberculosis Hospitals, by Provinces, 1946

<sup>1</sup> Four units in public hospitals at Vancouver and Victoria are operated by the Provincial Board of Health and are included with Sanatoria.      <sup>2</sup> Sanatoria only (exclusive of units in other hospitals).  
<sup>3</sup> Includes other personnel.

### Subsection 2.—Statistics of Federal Government Hospitals

Hospitals operated by the Federal Government are conducted for special purposes connected with departmental administration such as the care of war veterans and members of the Permanent Force, the quarantine and care of immigrants and lepers, the care of Indians as wards of the Government, etc. Table 1 shows the number of Dominion hospitals compared with those in other categories for 1946.

**Department of Veterans Affairs Hospitals.**—There was considerable adjustment in the hospital accommodation during the calendar year 1947. Eleven of the Service hospitals which had been taken over and operated by the Department
