

were closed, leaving 6 of this group in active operation. Of the new construction coming into use 300 replacement beds were added; these were in Sunnybrook hospital, Toronto.

Throughout the year plans were formulated to replace obsolete accommodation and improve facilities in all Districts. About 1,250 beds are expected to come into use during the calendar year 1948.

Active Treatment Hospitals provide treatment for general medical and surgical conditions. In the larger institutions, facilities are available for orthopaedic surgery, plastic surgery, neuro-surgery, neuro-psychiatry, the treatment of arthritis, etc.

Four special centres are maintained in conjunction with larger hospitals for the care of paraplegics, which care is now available to non-veterans under certain conditions. In addition, special treatment centres are operated for the care of tuberculosis and neuroses. Active convalescent facilities are provided in seven Health and Occupation Centres. There are nine veterans homes which provide domiciliary care for veterans requiring it.

Accommodation and movement of patients is shown by type of hospital for 1947 in Table 7, while Table 8 gives monthly data re types of treatment and status of recipient.

7.—Accommodation and Movement of Patients in Veterans Affairs Hospitals, 1947

NOTE.—Patients in veterans pavilions attached to civilian hospitals are not included.
