7.—Wood Cut in Operations in the Woods, Equivalents in Merchantable Wood and Total Values, by Chief Products, 1945 and 1946, with Comparative Totals, 1936-44

NOTE.—Details by chief products and by provinces for the years 1926-45 will be found in the "Annual Estimate of Operations in the Woods, 1945", published by the Forestry Branch, Dominion Bureau of Statistics. A change in computing the converting factor was introduced in 1944-45 and is described at p. 265 of the 1946 Year Book.

¹ In estimating the annual drain on Canada's forest resources, certain converting factors have been used, each of which represents in cubic feet the quantity of merchantable wood used to produce one unit of the material in question.

² 175 for British Columbia coastal region.
