

Table 9, indicating the extent to which the manufacturing industries of Canada are concentrated in urban centres, shows by provinces the proportion of the gross manufacturing production contributed by cities and towns having a gross production of over \$1,000,000 each. In the more highly industrialized provinces of Ontario and Quebec such cities and towns in 1945 accounted for 89·9 p.c. and 91·5 p.c., respectively, of the totals for those provinces, while in the Maritime Provinces and British Columbia, where sawmilling, fish-packing, and dairying are leading industries, the proportions fell to 70·4 p.c. and 76·2 p.c., respectively. In the Prairie Provinces manufacturing is confined largely to a few urban centres.

9.—Principal Statistics of the Manufacturing Industries of the Six Leading Manufacturing Cities of Canada, 1933-45

NOTE.—The dyeing, cleaning and laundry industry is included for the years prior to 1936.
