Subsection 3.—Census Data on Earnings and Employment

The number of wage-earners, by sex and provinces, during the 12 months prior to the Census date, June 2, 1941, together with total and average earnings is given at p. 654 of the 1947 Year Book. More detailed information on earnings and employment of wage-earners during the same period is given in Vol. VI, Census of Canada 1941, for Canada, the provinces, counties and census divisions, for urban centres of 1,000 population or over and for certain metropolitan areas. Wage-earners are there classified by occupation, industry, conjugal condition, age and sex, earnings and weeks employed. Preliminary data on the number of wage-earners by amount of earnings are available from the 1946 Census of the Prairie Provinces for urban centres of 5,000 population or over in Bulletin 7-6010.
