

(1) non-interference with the present and proposed facilities of the CBC, and (2) that high-power transmission facilities, on both long and short-wave bands, are reserved for use by the CBC. Within these limitations, it is the policy of the Board to serve community interests by giving every practical encouragement and assistance to local stations.

The CBC operates three networks: the Trans-Canada and Dominion networks, serving English-language audiences from Atlantic to Pacific, and the French network, serving French-language listeners in Quebec. The Trans-Canada network is made up of 23 basic stations: 9 CBC-owned and 14 privately owned. The Dominion network consists of 30 basic stations, of which 29 are privately owned. The French network has 3 basic CBC-owned stations, and 10 privately owned stations. As of September, 1948, the CBC has 13 stations of which 7 have 50,000-watt transmitters. The CBC leases some 25,000 miles of wire lines each day in order to carry on network operations in Canada, which lies across five of the world's time zones. In order to present programs at suitable times, and to give expression to varying interests in the five regions, CBC maintains regional offices and production facilities at Halifax, N.S.; Chicoutimi, Quebec city, and Montreal, Que.; Ottawa and Toronto, Ont.; Winnipeg, Man.; and Vancouver, B.C.

5.—Broadcasting Stations of CBC Networks, as at Apr. 1, 1948

(Basic Stations)

NOTE.—The stations marked with an asterisk (*) are CBC-owned.
