

36.—Population of Incorporated Municipalities, by Provinces, 1941

| Province | Total Population | Population of Incorporated Municipalities | | | Percentage Municipal to Total Population |
|---------------------------|-------------------|---|------------------|-------------------|--|
| | | Urban | Rural | Total | |
| | No. | No. | No. | No. | |
| Prince Edward Island..... | 95,047 | 24,340 | Nil | 24,340 | 25.6 |
| Nova Scotia..... | 577,962 | 267,540 | 308,304 | 575,844 | 99.6 |
| New Brunswick..... | 457,401 | 143,423 | 312,153 | 455,576 | 99.6 |
| Quebec..... | 3,331,882 | 2,109,684 | 1,137,519 | 3,247,203 | 97.5 |
| Ontario..... | 3,787,655 | 2,338,633 | 1,316,133 | 3,654,766 | 96.5 |
| Manitoba..... | 729,744 | 321,873 | 344,648 | 666,521 | 91.3 |
| Saskatchewan..... | 895,992 | 295,146 | 528,532 | 823,678 | 91.9 |
| Alberta..... | 796,169 | 306,586 | 321,219 | 627,805 | 78.9 |
| British Columbia..... | 817,861 | 443,394 | 170,269 | 613,663 | 75.0 |
| Totals..... | 11,489,713 | 6,250,619 | 4,438,777 | 10,689,396 | 93.0 |

Subsection 2.—Municipal Assessed Valuations

The revenue resources of municipalities are limited generally to direct taxation, based on assessed valuations of real and other types of property. The assessment of personal property has had its ups and downs particularly in the Prairie Provinces. The Maritime Provinces, Manitoba and Alberta are the only provinces at the present time in which municipalities assess and tax personal property. In Alberta in 1946 there was an increase in the use of this basis for tax revenue by villages while in Manitoba it is used generally by all classes of municipalities, except cities. Aside from real property, the next important type of valuation for taxation purposes is business assessment, although not all provinces assess for business purposes separately and distinctly from real property valuations. A variation of methods, schedules and rates exists not only between provinces but also between municipalities within the same province. Some municipalities use the rental basis, others the value of floor space occupied and still others the capital value of the premises occupied. Most of the provinces have other miscellaneous types of assessment, the general nature of which will be noted from the footnotes to Table 37. It will also be noted that income assessment, which formerly was employed in Nova Scotia and New Brunswick only, disappeared in 1943. This is a result of the operation of the Dominion-Provincial Tax Agreements whereby the provinces and municipalities abandoned the income-tax field for the duration of the War and a limited period thereafter, so as to leave it open to the Federal Treasury.

It should be noted that the figures in Table 37 are not entirely comparable, on an interprovincial basis, from the standpoint of relative values of properties taxable for municipal purposes. Each province operates under its own assessment laws, which are not all similar, either in application or in effect. For instance, in British Columbia cities and municipal districts, improvements cannot be taxed on a value in excess of 75 p.c. of taxable values or in excess of 50 p.c. of taxable values in villages; the values actually taxed in 1946 ranged from nil to 75 p.c. In the majority of cases, improvements were assessed for tax purposes at 50 p.c. of taxable values, but for all municipalities the total improvements actually taxed represented approximately 47.7 p.c. of total taxable values. It should also be noted that Table 37 does not include assessed valuations in Improvement Districts for either Saskatchewan
