Provincial Distribution of Production.—Only two provinces failed to establish all-time highs in net value of production in 1947. Prince Edward Island receded slightly from its 1946 peak of \$22,144,000 and predominantly agricultural Saskatchewan, despite a rise of more than 17 p.c. over 1946, failed to better its record of \$528,817,000 established in 1944.

The increase in net production in Quebec over 1946 was nearly 17 p.c.; as the gain in the Canadian total was approximately 20 p.c., the relative importance of this Province was less in 1947 than in the preceding year. Ontario, with a gain of 24 p.c. in 1947 gained ground in this comparison. Despite advances in Nova Scotia and New Brunswick of 6 p.c. and 17 p.c., respectively, these two Maritime Provinces, together with Prince Edward Island, lost in relative importance.
