Under the Meat and Canned Goods Act, establishments such as abattoirs and meat-packing plants that prepare meat products for export are subject to inspection. Local wholesale butchering and such slaughterings as are carried out by retail butchers and by farmers for their own use are not included in Table 20. Actually, the growth of the slaughtering and meat-packing industry has been accompanied by a concentration of the major part of the production into a comparatively small number of large establishments to facilitate greater efficiency and utilization of products. These figures, therefore, are fairly inclusive. The industry is dealt with in its proper relation to all other manufacturing enterprises in Chapter XVII. It normally ranks among the three largest manufacturing industries in Canada in gross values of production but it owes its importance to the value of raw products obtained from the farmer and rancher rather than to the value added by the manufacturing process.
