Figures include snuff.

Storage of Wines.—The wine industry is confined to a few localities such as the Niagara Peninsula in Ontario and the Okanagan Valley in British Columbia. Firms manufacturing native wines are not bonded, as far as the Federal Government is concerned, nor is wine in storage for maturing placed in bond. The only goods warehoused in bond in connection with wineries are their sugar supplies and supplies of grape spirit distilled by the distilleries and held by the wineries for fortifying their wines. A part of each year's production is, however, stored at the wineries at a cool and even temperature. Native wine produced and placed in storage for maturing and blending for the years 1944-47 was reported as follows:—

Year	Ontario	Other Provinces	Total
	3,863,592	349,958	4, 213, 550
	1,600,835	204,928	1, 805, 763

	3,871,622	424,567	4,296,189

Section 4.—Merchandising and Service Establishments*

Because of the multiplicity of establishments which make up the distributive system, complete coverage of merchandising and service establishments is possible only through the Censuses of 1931 and 1941. Although some information was gathered prior to 1931 the census of that year was the first complete survey of distribution encompassing all wholesale, retail and service businesses including hotels. Tabulations may be found in Volumes X and XI of the Census of 1931. The Census of 1941 included the same group of establishments with certain refinements and added statistics. Results for retail establishments are contained in Volume X and for wholesale and service establishments in Volume XI of the 1941 Census publications.

With the restoration of the supply of consumer goods following the end of the Second World War, business and industry became acutely aware of the value of marketing data to be obtained from the census surveys. However, as time elapsed,

^{*} Prepared in the Merchandising and Services Section, Industry and Merchandising Division, Dominion Bureau of Statistics.
