## Subsection 3.—Statistics of Tuberculosis Institutions

Table 10 shows that 25 p.c. of total bed capacity provided for tuberculosis patients in 1948, i.e., 3,572 out of 14,512 beds, were not located in public sanatoria. The importance of Federal Government and public general hospital units is such that movement-of-patient statistics in Table 11 include data from these units. As a result, comparison of patient and personnel statistics would be misleading, since the latter involve only personnel of public sanatoria.

Deaths from tuberculosis in these institutions during 1948 were 47 p.c. of the total deaths from the disease in Canada, as shown in the Chapter on Vital Statistics at p. . . of this Volume. However, the death rate from this disease has shown an encouraging decline since 1926.

## 10.—Bed Capacities of Tuberculosis Sanatoria and Tuberculosis Units in Other Hospitals, by Provinces, 1948

Item	P.E.I.	N.S.	N.B.	Que.	Ont.	Man.	Sask.	Alta.	B.C.	Total
