Teaching Staffs.—In 1948 the teaching staffs of the publicly controlled elementary and secondary schools numbered 19,349 men and 57,911 women, a total of 77,260. Omitting Quebec for which comparable data are not available, 31 p.c. of the teachers were in cities, 28 p.c. were in one-room rural schools, 22 p.c. in towns and villages and the remaining 19 p.c. in schools of two or more rooms outside of urban centres. The proportion of men teachers is increasing and in 1948 reached 27 p.c., a little short of the pre-war level of 30 p.c. Again omitting Quebec where 36 p.c. of the teachers are members of religious orders, approximately 25 p.c. of the women teachers are married. Throughout the nine provinces at least 10 p.c. of the total number of teachers are untrained or only partially trained, also about 10 p.c. of the total staff leave the profession each year. During the 1947-48 school year there was an increase of \$243 in the median salary (see Table 4) for teachers in the eight provinces (Quebec excluded). The classification of teachers, their teaching experience and rates of salary paid are given in the Dominion Bureau of Statistics report “Teachers’ Salaries and Qualifications in Eight Provinces, 1948”.
