

vegetable and seed production and surveys dealing with orchards, small fruits, flowering bulbs and greenhouse areas; also suppression of insect pests and plant disease inspection with control of noxious weeds and general promotion of crop production. (4) The Agricultural Development and Extension Division includes field-extension work through the district agriculturist service, clearing agricultural lands for production, agricultural engineering, farm labour supply, and junior club projects. Extension Division officials of the Department are located in 32 agricultural centres throughout the Province.

Subsection 2.—Agricultural Colleges and Schools

All provinces with the exception of Newfoundland, Prince Edward Island and New Brunswick provide facilities for training in agricultural science at university level. Such colleges are administered by either the Department of Agriculture or the Department of Education of the respective province. At the secondary school level, practical courses in agriculture are included in the high-school curricula of all provinces except Newfoundland and Prince Edward Island. The Province of Quebec provides for such instruction in special schools.

3.—Agricultural Colleges and Schools, by Provinces, 1950

Province	Number and Type	Course
Newfoundland.....	—	—
Prince Edward Island.....	—	—
