### Section 3.—Production by Industrial Groups and Individual Industries

For the purposes of the Census of Manufactures, the main detailed analysis is made under a classification in which industries are grouped according to the chief component materials of the goods manufactured. Statistics of individual industries are presented in detail in the report "Manufacturing Industries of Canada, 1947" pp. 20-25. Less detailed analyses are given under the standard classification grouping in Tables 10 and 11, the purpose grouping in Table 12 and origin grouping in Table 13.

#### Subsection 1.—Manufactures Grouped by Chief Component Materials

Table 8 shows the recovery after the depression, the impact of the Second World War and the post-war developments upon the main groups of industries with regard to the numbers employed, the salaries and wages paid, and the gross value of products. These figures should be related to those of Table 6 which shows changes in volume of production. The number of employees in 1944 increased by 86 p.c.
