

of the provinces under the British North America Act, certain Federal Departments are also concerned with specific aspects of these subjects and, as is the case with the Dominion Bureau of Statistics, in co-ordinating and presenting the material for Canada as a whole.

As a general guide to the public, it may be pointed out that questions relating to the actual development and administration of resources should be forwarded to the particular provinces concerned. The Federal Government, while not administering the resources within provincial boundaries, co-operates closely with the provinces and is in a position to furnish material for Canada, especially production data, on a national basis, marketing data on international, national and provincial bases, research work and experimental station data on a national basis, and also on a provincial basis from Federal Government stations located within particular provinces. In agriculture, for instance, data on the breeding of live stock and the improvement of strains, on agricultural marketing and crop yields are cases in point—in forestry, questions of forest research, forest fire protection and reforestation offer good examples. Where inquiries are directed to federal sources, they should, as a general rule, be sent to the individual departments listed in the Directory for information not of a statistical nature but, whatever the subject, where the information required is clearly statistical, they should be addressed to the Dominion Bureau of Statistics.

Bearing these points in mind, the reader will be able to apply the information given in the Directory to best advantage.

In the Directory, symbols are set against individual sources of information to give special information such as availability of detailed lists of publications, the costs of such lists (in cases where a charge is made), or information of other kinds. All departments, whether federal or provincial, are prepared to furnish information in their respective fields free of charge although, where special compilations are called for, a nominal charge is sometimes made.

The address for all federal departments is Ottawa, Ontario. Inquiries forwarded to provincial departments should be addressed to the provincial capitals concerned:—

Newfoundland.....	St. John's	Ontario.....	Toronto
Prince Edward Island...	Charlottetown	Manitoba.....	Winnipeg
Nova Scotia.....	Halifax	Saskatchewan.....	Regina
New Brunswick.....	Fredericton	Alberta.....	Edmonton
Quebec.....	Quebec	British Columbia.....	Victoria

Inquiries about Yukon and the Northwest Territories should be addressed to Ottawa.

The King's Printer and Controller of Stationery, Ottawa, who is charged under the Public Printing and Stationery Act with responsibility for the sale and distribution of government publications, issues an Official Catalogue and price list of all Federal Government publications printed from type, or by offset. This Catalogue, including the price list, may be obtained on application at 25 cents per copy, is classified on a subject basis and is adequately cross-referenced; it is revised at regular intervals.

The titles of some of the publications offered for sale to the public by the King's Printer and Controller of Stationery at Ottawa or by Provincial King's Printers may also be found in lists of reports, mimeographed or produced on duplicating machines, released by federal or provincial departments and obtainable from these sources free of charge.
