

The Ninth Census of June 1, 1951, showed the population of Canada to be 14,009,429, representing an increase of 2,502,774 or 21·8 p.c. over the 1941 figure of 11,506,655. Newfoundland's entry into Confederation accounted for 361,416 of this increase. Excluding Newfoundland, the population in 1951 totalled 13,648,013, an increase of 2,141,358 or 18·6 p.c. over the 1941 population of the nine provinces and the territories. This numerical increase is the largest on record and the percentage increase has been exceeded only twice since the turn of the century. In 1921 it was 21·9 p.c. and in 1911, 34·2 p.c. The population increase in this decade is all the more remarkable when consideration is given to the fact that immigration was heavily restricted during the war years. With the resumption of immigration in the post-war years, however, Canada gained some 548,000 in population through immigrant arrivals over the decade. The period 1941-51 was characterized also by high birth rates, and the natural increase was just under 2,000,000 for the ten-year period.

Since 1867, decennial censuses have been taken as at Apr. 2, 1871, Apr. 4, 1881, Apr. 5, 1891, Apr. 1, 1901, June 1, 1911, 1921, 1931, June 2, 1941, and June 1, 1951. Population totals by provinces and territories are given in Table 1, together with figures showing the percentage distribution of population and the numerical and percentage increases in population by decades.

### 1.—Numerical and Percentage Distribution and Numerical and Percentage Increase of Population, by Provinces and Territories, Decennial Census Years 1871-1951

NOTE.—The populations of the Prairie Provinces in 1906, 1916, 1926, 1936 and 1946 are shown at p. 131 of the 1951 Year Book. Intercensal estimated populations from 1867-1904 will be found at p. 141 of the 1936 Year Book; from 1905-30 at p. 127 of the 1946 edition; and from 1931-52 in Table 9, p. 143, of the present edition.
