¹ Figures for Newfoundland are not included in these totals except for the years 1949 and 1950.

Deaths in Urban Centres.—In Table 22 deaths are classified by place of residence. The rates in urban centres vary only slightly from those of their respective provinces. However, due to the influx of young people from the rural areas, the age distribution of the population in urban centres is often more favourable to a low death rate than that of the province as a whole.

22.—Deaths in Urban Centres of 10,000 Population or Over,¹ 1947-50, with Averages, 1941-45
