**Causes of Infant Deaths.**—Of the 15,324 infant deaths in 1950 almost 15 p.c. were due to immaturity; 12 p.c. to congenital malformations; over 11 p.c. to pneumonia among infants over 4 weeks of age and over 10 p.c. were due to injury at birth. These specific causes accounted for almost one-half of the total infant deaths.
