Subsection 3.—Statistics of Tuberculosis Institutions

Table 10 shows that 22.3 p.c. of total bed complement provided for tubercular patients in 1950, i.e., 3,961 of the 17,790 beds, were located in Federal Government sanatoria, tuberculosis units in Federal Government hospitals, and tuberculosis units in public general hospitals. Movement of patient statistics in Table 11 include data from these sources. As a result, any comparison of movement of patients and personnel statistics will be misleading since the latter involve only personnel of public sanatoria.
