Section 4.—Statistics of Agriculture*

The collection, compilation and publication of statistics relating to agriculture is a responsibility of the Dominion Bureau of Statistics. Valuable information is obtained through the Decennial Census of Canada and each Census of the Prairie Provinces. Very few of the results from the 1951 Census were available when this Chapter of the Year Book was prepared but have been incorporated wherever possible. Detailed agricultural census statistics are published in bulletin form and may be secured from the Dominion Statistician, Ottawa.

The Bureau also collects and publishes primary and secondary statistics of agriculture on an annual and monthly basis. The primary statistics relate mainly to the reporting of crop conditions, crop and live-stock estimates, values of farm lands, wages of farm labour and prices received by farmers for their products. The secondary statistics relate to the marketing of grain and live stock, dairying, milling and sugar industries and cold-storage holdings.
