Lumber Exports.—For exports of planks, boards and square timber see Chapter XXI, Foreign Trade.

Subsection 3.—The Pulp and Paper Industry

Most of the textual information and the tables normally appearing under this heading have been incorporated, in this edition, in the Special Article on "The Pulp and Paper Industry in Canada". The exceptions are wood-pulp statistics of leading countries and the world newsprint statistics which are given in the following paragraphs.

World Pulp Statistics.—Figures of production, exports and imports of pulp for certain countries of the world have again become available after the interruption caused by World War II and are shown for 1950 in Table 14. It is estimated that these countries produce approximately three-quarters of the world supply of pulp.
