

5.—Paper Production, by Provinces, 1949 and 1950

| Province   | 1949                              |  | 1950                              |  |
|--|-----------------------------------|--|-----------------------------------|--|
|  | Quantity                          | Value                                    | Quantity                          | Value                                    |
|  | tons                              | \$                                       | tons                              | \$                                       |
| Quebec<br>Ontario<br>British Columbia                    | 3,222,063<br>1,817,933<br>471,619 | 310,752,857<br>189,616,876<br>46,478,981 | 3,315,631<br>1,903,721<br>498,286 | 339,748,513<br>211,416,005<br>52,845,416 |
| Nova Scotia, New Brunswick, Manitoba and<br>Newfoundland | 1,028,354                         | 94,611,124                               | 1,094,397                         | 106, 143, 892                            |
| Totals   | 6,539,969                         | 641,459,838                              | 6,812,035                         | 710,153,826                              |

The industry's output of products; other than newsprint, has expanded in a spectacular fashion in the past thirty years. The production of pulp for sale increased two and one-half times; paperboard production increased to nearly eight times its 1922 total; wrapping paper production almost trebled; book and writing paper more than trebled; the output of tissue paper increased to almost twenty times its 1922 level, and all other paper grades, excluding newsprint, increased five-fold.
