Iron Ore.—Production of iron ore in 1951 at 4,700,000 tons was the largest on record being about 31 p.c. over the 1950 figure. This tonnage is also close to the country's present requirements but the premium quality ores from northern Ontario are in demand by the steel makers in the United States, so that there is an exchange of more than 3,000,000 tons annually.

Developments now under way in the iron-ore industry give promise of greatly increased production within the next few years. The Wabana mine in Newfoundland is being completely mechanized and output will be stepped up next year; the Helen mine in the Michipicoten district in northern Ontario has changed over to underground operations; and Steep Rock in northwestern Ontario is proceeding steadily with its expansion program. Near Marmora, in southeastern Ontario, the Bethlehem
