Average Annual Earnings in the Forty Leading Industries.—In 1949 there were 20 industries in which the average salary was \$3,000 or over, compared with 16 industries in this range in 1948. The rapidly changing pattern of remuneration in manufacturing is shown by the fact that in 1945 the highest average salary paid was \$2,935 reported by the brewing industry. The highest average salary in 1949 was \$3,977 received by office and supervisory employees in the pulp and paper industry. In the remaining 20 leading industries, 13 had average salaries of between \$2,500 and \$3,000 and seven were below \$2,500. The sawmill and butter and cheese industries, with \$1,283 and \$1,800, respectively, paid the lowest salaries in the forty leading industries.

The increase in average wages since 1945 paralleled that of salaries. There were 23 industries averaging over \$2,000 in 1949 compared with only four in 1945. In 1945 the highest average annual wage was \$2,365 paid by the motor-vehicle industry while in 1949 the highest was \$2,851 paid by the pulp and paper industry. The highest wages are usually paid by industries in which the proportion of skilled workers is high and the proportion of female workers low. There were seven industries in 1949 with average wages of \$2,500 or over and 16 in which the average ranged between \$2,000 and \$2,500. In the other 17 industries of the forty leading
