Not comparable with previous years. <sup>2</sup> Publication of these figures authorized by the two firms concerned. <sup>3</sup> Includes bridge-building and structural steel, non-ferrous metal smelting and refining, biscuits, and sugar refineries. <sup>4</sup> Other leading industries for which figures cannot be given because there are fewer than three establishments are: non-ferrous metal smelting and refining, and vegetable oil mills. <sup>5</sup> Includes malt and malt products; sugar refineries; cheese, processed; condensed milk; boxes and bags, paper; bridge-building and structural steel; cement; glass and glass products; fertilizers; and vegetable oils.

## Subsection 5.—The Manufactures of British Columbia

British Columbia, with a gross value of production of \$959,008,088 in 1949, was again the third most important manufacturing province in Canada. About 22 p.c. of that amount was contributed by the sawmilling industry, followed by pulp and paper, fish processing and meat packing. Shipbuilding, which occupied first place during the war years, was in fifteenth place in 1949; at the height of its productive effort in 1943 it employed 31,238 persons who were paid \$64,939,484 in salaries and wages, while the value of production reached the unprecedented figure of \$155,536,396. The shipbuilding industry was still in 1949 the seventh largest employer of labour in the Province and paid out the fourth highest amount in salaries and wages.

Emphasizing the importance of the forests in the industrial life of the Province, the sawmilling industry ranked first with a gross value of production of \$209,607,511 and the pulp and paper industry second with \$69,925,185. Third in importance
