¹ 5,000 watts during daytime; 1,000 watts at night.

² 1,000 watts during daytime; 250 watts at night.

CBC International Service (Shortwave).—The International Service, inaugurated on Feb. 25, 1945, is operated by the Canadian Broadcasting Corporation on behalf of the Canadian Government. Its aim is to tell the people of other countries about Canadian life and thought, and to help unify the western world in defence of freedom.

The International Service, now in its eighth year of operation, has grown to meet the requirements of Canada's expanding interest and influence abroad. The two 50,000-watt transmitters at Sackville, N.B., are linked by approximately 600 miles of land lines with studio and program headquarters in the Radio Canada Building, Montreal, Que., from which programs are broadcast daily in English, French, German, Czech, Slovak, Dutch, Swedish, Norwegian, Danish, Italian, Spanish, Portuguese, Russian and Finnish. With technical facilities transmitting a signal unequalled by any other from the North American continent, the International Service has succeeded in reaching increasingly large audiences in Europe, Central and South America, the Caribbean and the South Pacific area.

Almost 200,000 letters have been received from listeners in all parts of the world attesting to the strength of the International Service signal and to a wide interest in Canada and Canadian programs. Many listeners request specific information on a variety of topics ranging from trade conditions to social and educational matters. These inquiries are answered by the language sections or are referred to the Government Departments directly concerned. Reception reports are also verified.

In addition to broadcasting Canadian programs approximately 14 hours daily, the International Service has developed a liaison with broadcasting organizations in other countries so that an increasing number of programs are relayed over national
